WHY CHOOSE REGENCY?

At Regency, our past 40 years have been focused on providing a high-level of service while building high-quality and reliable products that our customers can enjoy for years to come.

HIGH-QUALITY

Producing a high-quality product has been at the very heart of what we do from when that very first stove rolled off the production line over 40 years ago to today. We are ever-focused on producing quality products for our customers that will last for years to come.

BEST WARRANTY

A fireplace should be reliable and should work right the first time it is used, and the 1,000th. A core part of our business is making sure that we are building long-lasting, durable, high-quality products; we back-up that commitment with the industry's best warranty on all our products.

COST-EFFICIENT

Never before have home heating costs been higher. Turn your furnace way down and zone heat with our beautiful, reliable and convenient Regency products. Not only can you cut your fuel bills in half, but you'll be able to enjoy the timeless comfort of a Regency fire.

Why Regency? Because it's **more** than a fireplace!

GAS INSERTS **REDEFINED**

Experience The Most Realistic Fire

Re-defining what's possible with a gas insert; introducing the all-new Regency Atmosphere Collection. The first of our next generation of gas fireplace inserts, Atmosphere collection has been designed from the ground up to fit into more spaces, deliver an industry-leading viewing area and provide unmatched views of our new revolutionary patent-pending infusion burner technology.

Mix & match accessories with almost 450 different combinations of accessories, making these new units our most flexible and stunning gas inserts ever!

Elevate realism & elevate your expectations of a gas insert with the all-new Atmosphere collection from Regency.

EXPERIENCE THE Gi29 (VIDEO):

INFUSION BURNER

Featuring Our Latest Technology

Inspired by nature and fueled by innovation, Regency's new patent-pending infusion burner technology delivers an unparalleled realistic flame and log set. Homeowners can now truly enjoy the look and feel of a traditional wood fire at the touch of a button.

By reimagining what's possible, Regency designers have replicated the beauty of a real wood fire by infusing the burners into the log set, creating a natural burning log effect for the **most natural gas insert** available. Unmatched by any traditional burner, the Infusion Burner will elevate the standard for Gas Inserts. Our all-new patent-pending infusion burner technology creates a burning log look so realistic your guests will have a hard time telling whether it's wood or gas!

Gi29LE shown with a regular faceplate with traditional antique copper surround, volcanic black brick inner panels, and oak log set.

ATMOSPHERE GAS INSERTS

Regency's Most Advanced Gas Inserts

Experience the most realistic gas fireplace inserts available. The all-new Atmosphere collection is designed to fit into more homes and provide a class-leading viewing area, so you **see more of what matters - the fire**.

REGENCY ENERGY™ E33

Large Gas Fireplace Insert

E33 shown with Low Profile faceplate and brick panels.

AN ATTRACTIVE HEAT SOURCE

The E33 large gas fireplace insert is a high-efficiency heat source that is designed to seal old drafty fireplaces and provide controllable gas heat. With a standard variable-speed blower, the E33 helps circulate air within the room, distributing it further than radiant heat alone. This unit is a sealed system that uses outside air for combustion – making it perfect for airtight homes.

SPECIFICATIONS	NATURAL GAS	PROPANE
Input (BTU)	38,000	35,500
Turn down to (BTU)	20,000	19,000
Efficiency (steady state)	70.14%	70.73%

OTHER OPTIONS

MAXIMIZING COMFORT AND EFFICIENCY

Regency Fireplace Inserts deliver controllable heat solutions that combine the latest in radiant and convection heat technology with innovative features:

- Adjustable flame/heat control with Proflame remote controls (not available for U31)
- Heat radiating ceramic glass for maximum radiant heat
- Safety screen
- Variable speed blower to distribute heat into the farthest corners of your room
- Intelligent Ignition System* features fuel-saving intermittent pilot ignition (IPI), 7-day continuous pilot mode (CPI), and 5 second Flame Failure Response Time (FFRT) for more reliable startups - even in cold weather
- Power's Out, Heat's On. Never worry about being cold during a power outage again! All Regency gas fireplaces operate without electricity. Enjoy peace of mind all winter long.

*Not available for L234, U31, E33.

REMOTE CONTROL - INCLUDED

Proflame I GTMF Remote Control

Proflame II GTMF Remote Control

Create optimal comfort with ease and convenience at the touch of a button with a Regency remote control. Our **user-friendly programmable controls** can be set, adjusted, and programmed for your fireplace to turn on at the temperature you want, when you want it.

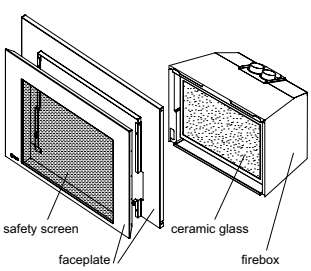
· Not available
✓ Standard

**Smart Thermostat - Rather than a thermostat that simply turns your fireplace on and off, the smart control function allows you to set your desired room temperature. As the room reaches your personal setting, the flame intensity and heat will gradually decrease – keeping the ambiance of your Regency fire on with less heat output, and the option to turn it off at any time.

SAFETY SCREEN

Regency has integrated a custom designed safety screen into each faceplate design that meets or exceeds current North American safety legislation.

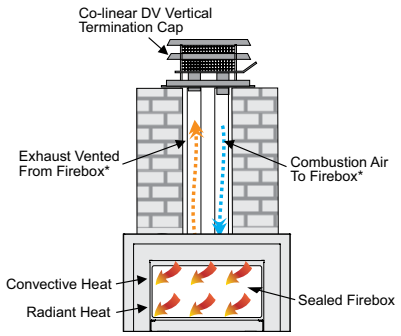


OTHER OPTIONS

DIRECT VENT TECHNOLOGY

Regency gas insert is a specially engineered, sealed fireplace that slips into your existing masonry or pre-fab fireplace to create a high-efficiency heating system with a beautiful fire. The airtight firebox uses outside air for combustion, helping maintain indoor air quality and keeping all the warmth generated from your fireplace in your home.

Even when the fireplace is turned off, the sealed system will prevent cold air from entering the home and warm air from leaving.



*May be reversed on certain models.

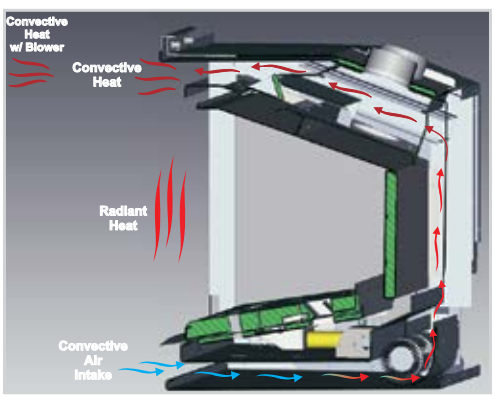
INTELLIGENT IGNITION SYSTEM*

The Intelligent Ignition System included in Regency gas fireplace inserts helps save you money while maintaining fireplace reliability and performance. It does this by ensuring the pilot light is lit only when it is needed. With intermittent pilot ignition (IPI), the pilot light is lit only before the fireplace is used.

For colder climates, the fireplace can also be set to **continuous pilot mode (CPI),** where the pilot will stay lit for up to 7 full days between uses. With a new 5 second **Flame Failure Response Time (FFRT)** sensor, the ability to light the pilot light the first time is improved drastically, especially in cold climates. Experience increased reliability, performance and lower gas bills with the intelligent ignition system from Regency.

*Not available on L234, U31, E33.

SPREAD THE WARMTH



Blower

REMARKABLE EFFICIENCY

The precision-engineered heat exchanger systems dramatically increase the overall heating efficiency of these Regency gas inserts. The cold air from your room passes through the pre-heated heat exchanger system, which is then re-distributed back into your room as comforting warm air (also known as convection heat).

POWERFUL RADIANT HEAT

Not only do these gas inserts include the latest innovations in fireplace technology and efficiencies, they also generate a large amount of radiant heat from the flames and glow of the fire package. The heat from the fire radiates through the ceramic glass and transfers that warmth to you, providing the perfect combination of radiant and convective heat distribution.

VARIABLE SPEED BLOWER TO MAXIMIZE EFFICIENCY

Regency blowers are a standard feature with all gas inserts. A blower will let you enjoy the warmth of your fireplace from any corner of your living space. Our quiet blowers increase the efficiency of your fireplace by pushing the heat produced by your fireplace forward, distributing it further, and evenly into your room.

FIREPLACE SELECTION WORKSHEET

We want you to enjoy your beautiful Regency fireplace for years to come. To help you figure out which product is just right for your home, fill in the following worksheet. Once complete, visit your nearest Regency dealer. Your professional Regency dealer will assess your needs - including local building codes - and install your Regency.

1. BASIC PRODUCT FUNCTION QUESTIONS

a. I would like my unit to provide me with:
- ☐ Supplemental heating
- ☐ Priority heating

b. The room/rooms I would like to heat are: _____ sq. ft.

2. FIREPLACE PRODUCT TYPE AND MEASUREMENTS

a. I am:
- ☐ Installing a new fireplace
- ☐ Installing into an existing fireplace

b. Fill in the following measurements:
- Ceiling Height: _____
- Location in the room: _____

c. What is the:
- Flooring material: _____
- Wall material: _____
- Ceiling material: _____

d. Fireplace opening dimensions:
- Width (front): _____
- Width (back): _____
- Height: _____
- Depth: _____
